## DESIGN AND WORK EXPERIENCE

---

### Junior UX Engineer

At WeTheDevelopers

2018 -2019

- Developed user flows, wireframes and interactive prototypes for shared portal - a feature that aggregates the collaboration between users and their customers from all siloed applications.
- Designed and shipped the User-Customer engagement feature on shared portal.

### User Experience Design Intern

At WeTheDevelopers

2017 - 2018

- Delivered low and high-fidelity wireframes that align with Teams design guidelines using Abode XD and Sketch.
- Participated in brainstorming sessions and designed sprints for future functionalities of Teams platform.

### Student Assistant

At CSU, Dominguez Hills

2020-2021

- Helped students become familiar with university resources, advised and referred students to appropriate university resources as the need arise.
- Assisted students with their admission forms and mentoring them with university work.

## PROJECTS

---

### Vibraninum Lab Grown Diamonds

At WeTheDevelopers

- Collaborating with stakeholder and other in-house web teams to work on a pacific feature called "Inventory Advanced Search".
- Iterated the UX designs based on business requirements and user research findings.

### IEEE – Event Management System

At CSU, Dominguez Hills

- Developed a web app accordingly to the research and the IEEE department.
- Came up with solutions and planned user flows and created wireframes and mockups based on modern UX/UI principles.

### StayNtouch – A Community App

At Google UX Design Certificate

- Collaborated with other UX-er to determine the design solution. Completed an end-to-end design process with a mobile-first approach.
- Led wireframes and rapid prototyping to build app for community.
